Uniview EZStation Quick Start Guide

1. Download EZStation

1. Visit the Uniview download page.
   https://www.uniview.com/Products/Software/PC/EZStation/
2. Download the latest EZStation version for Windows.
3. Save the installer to your computer.

2. Install EZStation

1. Double-click the installer.
2. Click **Next** through the installation wizard.
3. Accept the license agreement.
4. Choose the default installation folder.
5. Click **Install**.
6. Launch EZStation when setup completes.

3. First-Time Setup

1. Open EZStation.
2. Create a password for the local administrator account. (This is to log into the EZStation software on your computer, not the NVR)
3. Log in using the account you just created. (Remember your login info.!!)

4. Add Your NVR

1. Open **EZStation** and log in.
2. Click **Device Management**.
3. Click **Add Device**.
4. Select **IP/Domain**.
5. In the **Address** field, enter the IP address of your NVR, : **eg. 192.168.0.10**
6. Enter the NVR's: Username: **username** , Password : **password**
7. Port number (leave the default unless instructed otherwise)
8. Click **Add**.
9. Wait a few moments for the device status to show **Online**.

5. Live View

1. Select the Control Panel tab then Click **Live View**.
2. Expand your device list. (double click on the device to load all the cameras)
3. Or Double-click a single camera.
4. Optionally drag cameras into view windows as desired.

Common actions:

- Double-click a camera to maximize.
- Double-click again to return.
- Use layout controls to display multiple cameras.
- Right click on any camera for more options (e.g. Select Stream Type, then Main for a higher resolution image)

6. Playback Recorded Video

1. Click **Playback**. (Select Control Panel tab first)
2. Select the camera.
3. Choose a date.
4. Choose a time.
5. Click **Search**.
6. Use the timeline to navigate recordings.

7. Export Video

1. Open Playback.
2. Find the desired recording.
3. Mark the start time.
4. Mark the end time.
5. Click **Export**.
6. Choose a location on your computer.

8. Taking Snapshots

1. Open Live View.
2. Select the desired camera.
3. Click the Snapshot icon.
4. The image will be saved automatically.
